A Software Engineer who graduated from the TCC in Damascus, from the top 10 of the class, and fluent in several languages like C#,, SQL, mySql and Oracle and frameworks like Windows Forms,PhP Laravel
and advance in javascript and react.js and backend Node.js framework Express.js with mongodb

## EDUCATION AND TRAINING

– Associate Degree TCC (Technical Computer Collage) Software Engineering Damascus University
Final grade: 81.7%

– Bachelor's degree Applied College in Computer Technologies
Damascus University

## CERTIFICATIONS

- Certificate of Higher Institute of Computer Technology(TCC), specializing in Software Engineering

- Certificate from Bytes4future from Mr. Joaquim, Director of Run Code School in Portugal, for more than 700 hours of attendance until I became a developer (MERN STACK)Under the supervision of Ms. Basma, the project officer.
  For inquiries, this is her number: +963 961 124 439

## PROFESSIONAL EXPERIENCE AND PROJECTS

**Freelance**
Worked 6 months as a freelance developer (mern stack)

## PROJECTS

**music Spotify**

- The Spotify website in react.js contains a json file for a real user and the data is displayed in it. There are also filtering operations on the data and we will develop it as backend express.js
- Link github :https://github.com/naya-web/spotify-proj

**Real estate rental site**

- A real estate rental website developed in express.js, mongodb as a backend, and react.js as a frontend from the rental website. It displays apartments with their information and their rental price, as it has three users: the client, the owner, and the admin. There is also a special dashboard for the admin, such as adding an apartment to the owner of the property and modifying and deleting the apartment, including: In it, we can add a rental contract to the admin's dashboard so that the admin can manage and know each apartment and the person who is renting it.
- Link github: https://github.com/Firas-FA/Hackathon-Project.git

**Social networking site**

- A communication site where the user can publish posts, interact with other posts, manage his personal profile, and many other purposes. The API has been prepared in the backend of Express, and we will develop it as a frontend React.js later.
- Link github:https://github.com/YazanAlkhalil/SnowSociety-.git

## SKILLS

- Html 5
- C#(oop)
- Css3
- Javascript
- Php laravel frame work
- Node.js
- Express.js
- React.js
- Ui/Ux Design
- Analysing system
- Mysql
- Tailwind Css
- Git &Github
- Bootstrap

**E-learning platform**

- A multi-user educational platform in PHP Laravel, including a dashboard for the admin and a dashboard for the teacher. The site enables the student to take tests after each course he completes, and many other additions.

## LANGUAGE

- Arabic
- English  B1

## TRANING

- 6 months of hard work and more than 700 hours of training, I have completed the Bytes4future training camp as a mern stack web developer, managed and supervised by international trainers from Runcode School in Portugal, such as Mr. Rafael, and we have obtained a certified certificate from the international training scholarship.
